FUNCTIONALITY

These smart safes are the latest development in efficient cash management. With full LCD displays, touch screen technology and electronic note validators to verify each deposit. All transactions are recorded and printouts are available via the thermal printer. Deposited notes are stored inside a cartridge for clearance by a cash collection service

PURPOSE OF THE MACHINE

Prevention of

- ✓ Double counting
- ✓ Exposing cash when preparing for banking
- ✓ Armed Robbery
- ✓ Internal Theft

BENEFITS

- ◆ Note validator checks every note deposited
- ◆ Easy to use electronic deposit safe that secures cash quickly
- ◆ Detailed deposit reports of operator, register, time, date and end of shift
- ◆ Thermal printer for receipts and reporting purposes
- ◆ Bank connectivity via networking
- ◆ Reports to head office / and or cash transit company

APPLICATION

The Universal Clearance Safe is suited to any business that needs to disperse medium to high volumes of cash from a register to a holding / deposit safe.

By having the clearance safe near the register area, the operator can clear notes via the note reader into the safe. The safe will print off a receipt of the transaction plus an end of shift report can be provided. You can also deposit funds via the posting slot and you can manually enter the deposit into the safe via the touch screen.

	Width (mm)	Depth (mm)	Height (mm)	Weight (kg)
Clearance Safe	360	500	695	140
Set top box	360	235	190	9.4

**Allow 20mm all sides
